- Human-like reading voices you can customize for your preferred voice rate and volume
- Intuitive Help button describes every button's function
- Save files to CD
- Includes a classic literature starter library
- Read books you have saved on CD and also read DAISY-format books

Freedom Scientific's SARA Scanning and Reading Appliance is an affordable and easy-to-use solution for reading a wide variety of printed material, including books, mail, newspapers, magazines, and so much more.

SARA uses the latest in advanced optical character recognition technology to scan text and then read it aloud in crisp, clear speech. SARA automatically stores and remembers the contents of hundreds of thousands of scanned pages.

Start reading right away

You can start using SARA right out of the box, with no experience or training. Just place your book or document on the SARA, and press the scan button. SARA automatically recognizes the text and reads it to you. During the reading, you can adjust the voice rate and volume as well as fast forward and rewind. If you want to take time to examine a document in detail, pause and use the intuitive navigational keys to read line by line or word by word. You can even spell out words to get a better understanding of what is being spoken.

The blind and deaf-blind have the additional option of reading with the SARA in braille by connecting a braille display to the SARA via its USB port.
